GAMES INSTALLATION ON SAMSUNG E200

Last Updated On : January 03, 2008

Here is the complete detailed guide for games/ softwares installation on **Samsung E200** and other samsung mobiles like ***E830***, ***E250***, ***D900i*** and so on.

For games installation on Samsung E200, you need two softwares on your PC .... ***Softick PPP*** and ***Samsung Java Uploader***. To download these two softwares on your PC, visit this page:

Install Games On Samsung E200

This is the registration Key for Softick PPP 2.21 software :

380A-017K-2EJF-2SEF

But before proceeding, connect your mobile with PC through USB cable and start **Samsung PC Studio** software. You will see this screen on your computer:

After checking connectivity of your mobile with ***Samsung PC Studio*** software, ***CLOSE*** this software (I mean ***EXIT***).

Make sure that your mobile is connected to your PC through USB cable and check the COM port by going to ***"Start Menu/ Settings/ Control Panel/ System/ Hardware/ Device Manager/ Modems/ Samsung Mobile USB Modem 1.0/ Modem"***. Now, note down the ***COM port***. (I have Port : COM 4 But your's may be different) .

Now install ***Softick PPP*** software on your PC .... You will see this screen :

Press ***OK*** button.

Click ***Next*** button.

Press ***"I Agree"*** button.

Press ***Next*** button....

Click to ***Install***.... You will see this message :

Press ***OK*** button....

Select ***" Use USB port in exclusive mode"*** and press ***Next*** button....

Again press ***Next*** button....

Press ***Finish*** button.... This will complete the installation.

Now, in ***SYSTEM TRAY***, right click on it's icon and go to ***"Settings.... Bluetooth/Serial"*** .

Now, select ***COM : 4 port (/Device/ss_mdm0)*** and put check on it's checkbox.

Now, check it's properties:

Press ***OK*** then again press ***OK***.

Now, create a ***new network connection*** on your PC by following these steps:

Attention: If you are using a LAPTOP then SKIP this "New Network Connection" section and proceed from page# 14 of this guide.

On your PC, go to ***Start Menu/ Settings/ Control panel/ Network connections/ New Connection Wizard***.

Press ***Next*** button .

Select ***"Setup an advanced Connection"*** and press ***Next***.

Select ***"Connect directly to another computer"*** and press ***Next***.

Select ***"Host"*** and press ***Next*** .

Select ***connection device : COM1*** .... and press ***Next*** ....

Select ***users*** and press ***Next*** button....

Press ***"Finish"*** button.....

Now, go to ***Start Menu/ Settings/ Network Connections/ Incoming Connections***. And check that under General tab, there is only ***ONE*** check on incoming connections . ***i.e;Communications cable between two computers (COM1)***

Click it's properties and select ***port speed : 115200*** and press ***OK*** button....

Now, under users tab, put check on ***"Always allow.... a password"*** .

Under ***Networking***, you can see this screen:

Select ***Internet Protocol (TCP/IP)*** and go to ***"Properties"***. You will see this screen:

These IP addresses are automatically assigned by your PC . If you didn't get IP addresses then simply select **"Assign TCP/IP addresses automatically using DHCP"** option. Then press ***OK*** button.

Attention: LAPTOP users must join from here. Now, Start ***Softick PPP*** software from ***Start Menu/ Programs/ Softick/ Softick PPP/ Launch Softick PPP***.

You can see it's icon on system tray. Right click on it's icon and Click to ***"Activate PPP"*** option.

This will show this message :

Click ***"Cancel"*** to ignore this error message. Now, place mouse pointer on Softick PPP 's icon on system tray. You can see this message:

It means that you have successfully connected E200 with Softick PPP software.

If Softick PPP software shows ***"NOT connected"*** message then check that you are able to connect E200 with Samsung PC Studio software . If yes, then it means that you are using wrong COM port setting for Softick PPP software.

When you see ***"1 device connected message"*** . Then proceed to next step:

Now on E200, Go to *Menu/ Applications/ Java world/ Options/ Network Settings* and enter this:

APN: internet
Login ID : (Keep Empty)
Password : (Keep Empty)
Proxy : Disable
and press "Save"
If you don't enter APN name, then you cannot install any java application on E200 .

Start ***Samsung Java Uploader*** software and add the desired ***JAD*** file. Keep both ***JAR & JAD*** files in the same folder.

Now, on your mobile in standby mode, enter this code : ***#52828378#** to access the ***Java test Menu***.

Note: You can easily remember this code because (*#52828378# = *#JAVATEST#)

Select ***"OTA type setting"*** then select ***"Serial bearer OTA"***. Press ***Select***.

Still under ***Java Test Menu***, Select ***"Serial Test"***.

Select ***"PPP Up"***. Select ***"USB"***. Select ***"Serial Download"***.

On PC, you can see ***"Sending xyz.jad"*** while on E200, you can see the ***Java spals Screen*** with a progress bar. After the progress bar had finished, the game will start automatically. Change ***"OTA type setting"*** to ***"GPRS bearer OTA"*** after all java installations.

There is no jar file size limit when installs games by above method.

*To load multiple games just add another JAD file in the Uploader software and enter ***#52828378#** on your E200 in standby mode and select **Serial test** then **Serial Download** .... Please **DO NOT SELECT** "PPP UP" otherwise your mobile will restart and you will need to start the whole procedure from the beginning .*

After installation, **CLEAR the APN field in E200 java settings** otherwise you cannot access internet from midlet like Opera Mini and after installation, change ***"OTA type setting"*** *to* ***"GPRS bearer OTA"*** to remove any wap internet access problem.

If you have any problem regarding this whole procedure. You can ask at my email address :

Muhammad Usman Afzal

usmanafzal100@yahoo.com

usmanafzal101@gmail.com

Trouble Shooting :

If your mobile restarts / hangs , then try this:
1. Disconnect usb cable from mobile and restart it....
2. Right click on ***Softick PPP icon*** on system tray and shut down it ....
3. Exit the ***Java Uploader*** software.... Again open it and select ***JAD*** file....
4. Connect E200 to PC through USB cable
5. Right click on ***Softick PPP*** software icon and ***Activate*** it.... you can see ***" 1 device connected***

message"....
6. Enter ****#52828378#*** on the phone to access the ***Java Test Menu*** and select ***Serial Test*** then***"ppp up"*** then ***"USB"*** then ***"Serial download"***.
7. Java download will ***start*** immediately.

If my mobile does not start downloading for any reason then i uses the above process and i gets success every time. Make sure that you have entered (APN : internet) in java world settings. For incompatible softwares, java installation does not start and just java world opens.

E200 has NO jar file size limit when installing through USB cable. Keep both jar/jad files in same folder. Also check the available free memory of java world. If you have deleted any java software from java world BEFORE installation , then RESTART every thing. then proceed above process! Thanks!
