Setting your music free

With this Philips SBC BC730 cordless FM stereo speaker system it's possible to have the best in sound entertainment wherever you want in and around the house. Just connect the Philips transmitter to an audio source (CD player, TV or Hi-Fi system), plug each speaker into a mains outlet and tune in for the clearest signal; these powerful Philips speakers will do the rest.

Each speaker gives a whopping 40 Watts PMPO of music power through a two-way, double Bass Reflex system. Speaker volume can be varied using any Infra-Red remote control. And thanks to Philips innovative RF technology which enables FM stereo signals to pass through walls, signals from the transmitter can be picked up by the speaker up to 100 meters away! These compact speakers can be easily moved to where the action is. Their surround sound qualities will delight owners of stereo TV sets or Dolby Pro-Logic systems. And you can add as many Philips speakers (e.g. SBC BC735) or even RF headphones as you like to the system; there are no limits. Ideal for those who appreciate superb performance, good looks and the convenience of 'real freedom' in speaker systems.
