- 2. Kliknuti na PLUSIĆ foldera **www**, (obratiti pažnju da u levom gornjem delu panela, na plavičastoj liniji stoji rubrika sa www i iza njih nema ništa upisano !)
- 3. Kliknutu na ikonicu **New Folder** i dati folderu ime **slike** ili Images, važno je da je tačno onako kako nam se zove naš folder sa slikama na našem računaru gde smo smeštali slike za svoj web sajt,

 Sada kliknemo na ikonicu UPLOAD, zatim na Choose i tražimo svoj file koji se zove Index u svom računaru

Kada je Upload indexa gotov, vraćamo se u svoj administratorski panel, odnosno File Manager, sa leve strane kliknemo na novo-napravljeni folder **slike , pa na Upload i sada prenosimo na server sve slike iz svojih foldera** ...
