Step 1.

Da bi počeo instalaciju treba da stavis CD(butabilni) u CD-ROM i restartujes racunar. E sada da bi instalacija krenula treba da podesis u BIOS-u da ti je first boot CD-ROM. U BIOS ulazis tako sto odma na pocetak podizanja Win-a pritiskas taster **DEL** i pojavljuje se BIOS. Sada u biosu pronalazis tab **BOOT** i u tom tabu ce pisati **First boot** i secondary boot ali uglavnom na koji ti boot bude CD-ROM ti klikni na njega i pritiskajuci na taster plus(+) postavi CD-ROM na first boot a kada to uradis klikni na **F10** pa na **YES** i racunar ce se restartovati.

Quick opcija brze formatira a **normal** sporije formatira ali zato ima omogucenu opciju detekcije tzv “bad sectors” na hard disku. Mislim da je najbolje da odaberete “**Format the partition using the NTFS file system**”. (vidi sliku)

Step 16.

Kada kliknes na NEXT kod podesavanja vremena Win ce opet poceti nesto da kopira I posle odredjenog vremena ce se pojaviti prozor gdje treba podesish mrežu(network) ali tu samo klikaj na **NEXT** i posle snimanja komp ce da se restartuje a ti po obicaju ne diraj nista.
