Most DVDs are encoded for play in specific regions. To play a regionalized DVD on your computer, you must set your DVD drive to play discs from that region by selecting a geographic area from the following list.

CAUTION You can change the region a limited number of times. After Changes remaining reaches zero, you cannot change the region even if you reinstall Windows or move your DVD drive to a different computer.

Changes remaining: 4

To change the current region, select a geographic area, and then click OK.

- Israel
- Italy
- Jamaica
- Japan
- Jordan
- Kazakhstan
- Kenya
- ...
