instalacija windovs 7

Pre celokupne instalacije moramo setovati kompjuter da pokrene Setup za Win7 sa DVD-a a to cemo uraditi na sledeci nacin:

SETOVANJE BIOSA :

Kada ukljuciteracunari nekoliko puta stisnite taster DELETE ucicete u BIOS.

Zbog mnogo modela ploca i bio sami nadjte putanju gde vam se nalaze uredjaji koji se butuju (Boot Devices)... Zbog instalacije operativnog sistema morate da stavite da vam se sistem podize sa CD ili DVD rom-a kao drugi boot device stavite HDD/Hard disk/HDD 0

Uk dilko instalirate Win7 na hard na kome nema nikak vih podataka mozete slobodno ostaviti da First boot device bude HDD a drugi DVD, ali ako instalirate preko postojeceg OS-a morate set ovat i BLOS da First boot device bude DV D.

Znaci vas boot bi morao ovako da izgleda:

Primary boot device:CD/DV D rom Secondary boot:HDD(negde je i nazvan i Hard disc/HDD0/ili samo HD0) kad ste ovo ura dili stisnite ESCA PE nadjite SAVE stisnite dugme Y i stisnite ENTER

Akoste sve dobro uradili ra cunar ce se sam restartovati, ako ste neg de pogresili ponovite post upak.
