1. General Description

The LC320W01 is a Color Active Matrix Liquid Crystal Display with an integral External Electrode Fluorescent Lamp(EEFL) backlight system. The matrix employs a-Si Thin Film Transistor as the active element. It is a transmissive display type which is operated in the normally black mode. It has a 31.51 inch diagonally measured active display area with WXGA resolution (768 vertical by 1366 horizontal pixel array) Each pixel is divided into Red, Green and Blue sub-pixels or dots which are arranged in vertical stripes. Gray scale or the luminance of the sub-pixel color is determined with a 8-bit gray scale signal for each dot, Therefore it can present a palette of more than 16.7M(true) colors.

It has been designed to apply the 8Bit 1 port LVDS interface.

It is intended to support LCD TV, PCTV where high brightness, super wide viewing angle, high color gamut, high color depth and fast response time are important.

General Features

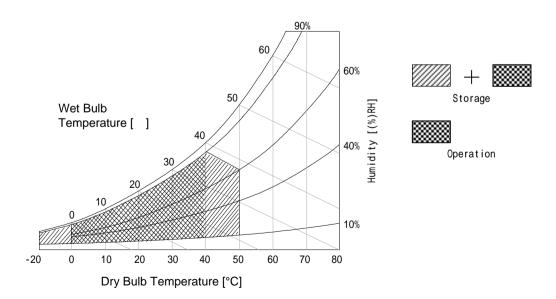

Active Screen Size	31.51 inches(800.4mm) diagonal
Outline Dimension	760.0 mm(H) x 450.0 mm(V) x 48.0 mm(D) (Typ.)
Pixel Pitch	170.25µm x 510.75µm x RGB
Pixel Format	1366 horiz. by 768 vert. pixels RGB stripe arrangement
Color Depth	8bit, 16,7 M colors
Luminance, White	500 cd/m ² (Center 1 point) (Typ.)
Viewing Angle (CR>10)	Viewing angle free (R/L 176(Typ.), U/D 176(Typ.))
Power Consumption	Total 88.7Watt (Typ.) (Logic=4.7W, Lamp=84.0W [I _{BL} =93mA])
Weight	7,200 g (Тур.)
Display Operating Mode	Transmissive mode, normally black
Surface Treatment	Hard coating(3H), anti-glare treatment of the front polarizer

2. Absolute Maximum Ratings

The following items are maximum values which, if exceeded, may cause faulty operation or damage to the LCD module.

Parameter		Symbol	Value		Unit	Remark	
Fc	arameter	Symbol	Min	Max	Offic	Remark	
Power Input	LCM	Vlcd	-0.3	+14.0	VDC	at 25 ± 2 °C	
Voltage	Backlight inverter	VBL	21.6	+27.0	Vdc		
ON/OFF Co	ON/OFF Control Voltage		-0.3	+5.25	VDC		
Brightness C	Brightness Control Voltage		0	+3.3	VDC		
Operating Te	Operating Temperature		0	+40	°C		
Storage Temperature		Тѕт	-20	+50	°C	Note 1	
Operating Ambient Humidity		Нор	10	90	%RH	Note 1	
Storage Hun	nidity	Нѕт	10	90	%RH		

Note : 1. Temperature and relative humidity range are shown in the figure below. Wet bulb temperature should be 39 °C Max. and no condensation of water.

3. Electrical Specifications

LG. PHILIPS LCD

3-1. Electrical Characteristics

It requires two power inputs. One is employed to power for the LCD circuit. The other input power for the EEFL/Backlight is to power inverter.

Table 2-1. ELECTRICAL CHARACTERISTICS

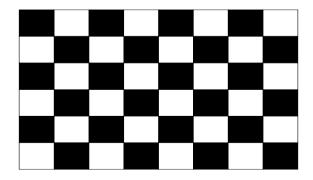

Parameter	Symbol		Value	Unit	Note		
	Cymbol	Min	Тур	Max	Ö		
Circuit :							
Power Input Voltage	VLCD	11.4	12.0	12.6	Vdc		
Bower Input Current	ILCD	-	390	450	mA	1	
Power Input Current		-	515	595	mA	2	
Power Consumption	PLCD		4.7	6.1	Watt	1	
Rush current	Irush	-	-	3.0	A	3	

Notes : 1. The specified current and power consumption are under the V_{LCD}=12.0V, $25 \pm 2^{\circ}$ C, f_V=60Hz condition whereas mosaic pattern(8 x 6) is displayed and f_V is the frame frequency.

2. The current is specified at the maximum current pattern.

3. The duration of rush current is about 2ms and rising time of power input is 1ms (min.).

Mosaic Pattern(8 x 6)

Table 2-2. ELECTRICAL CHARACTERISTICS

Parameter		Symbol	Value			Unit	Nata	
		Symbol	Min	Тур	Max	Unit	Note	
Inverter :								
Power Input Volta	ige		VBL	22.8	24.0	25.2	Vdc	1
Power Input Current		IBL	-	3.5	3.85	А	1	
Power Consumpt	ion		PBL	-	84.0	92.4	W	1
Input Voltage for	Brightness	Adjust	Vbr	0		3.3	VDC	2
Control System	On/Off	On	V on	2.5	5.0	5.25	VDC	
Signals	Signals On/Off Off		V off	-0.3	0	0.5	VDC	
Lamp :								
Life Time				50,000			Hrs	3

Note: 1. The specified current and power consumption are under the typical supply Input voltage, 24.0V.

Ripple voltage of the Power Input Voltage is under 0.5 Vp-p.

Inrush current of the Power Input Current is under +10% of the typical current.

2. Brightness Control.

This VBR Voltage control brightness.

VBR Voltage	Function			
3.3V	Maximum Brightness (100%)			
0V	Minimum Brightness.(30%)			

3. Specified values are for a single lamp which is aligned horizontally.

The Life Time is determined as the time at which brightness of the lamp is 50% compared to that of initial value at the typical lamp current on condition of continuous operating at $25 \pm 2^{\circ}$ C.

3-2. Interface Connections

LG. PHILIPS LCD

This LCD module employs two kinds of interface connection, a 30-pin connector is used for the module electronics and two 12-pin connectors are used for the integral backlight system.

3-2-1. LCD Module

- LCD Connector(CN1) : FI-X30SSL-HF (Manufactured by JAE) or Equivalent
- Mating Connector : FI-30C2L (Manufactured by JAE) or Equivalent

Table 3. MODULE CONNECTOR(CN1) PIN CONFIGURATION

Pin No	Symbol	Description	Note

27	NC	NC	
28	NC	NC	
29	GND	Ground	
30	GND	Ground	

Note: 1. If the Pin 9 is Ground, Interface format is "LG", and if the Pin 9 is Vcc(3.3V), Interface format is "DISM" See page 9 and 10.

- 2. The pin 30 should be ground, this pin 30 is necessary for LCD module test.
- 3. All GND(ground) pins should be connected together to the LCD module's metal frame.
- 4. All VLCD (power input) pins should be connected together.
- 5. Input Level of LVDS signal is based on the IEA 664 Standard.

Note : 1. VON : 2.5~5.0V

VOFF : -0.3~0.5V

- 2. Minimum Brightness : VBR = 0.0V Maximum Brightness : VBR = 3.3V
- 3. GND should be connected to the LCD module's metal frame.

3-3. Signal Timing Specifications

This is the signal timing required at the input of the LVDS transmitter. All of the interface signal timing should be satisfied with the following specification for it's proper operation.

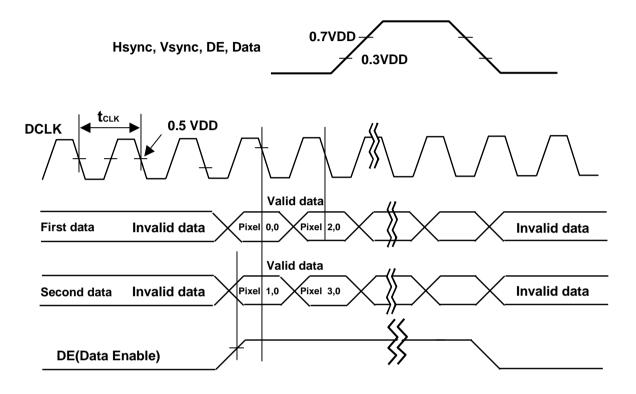

Table 7.	TIMMING TABLE
----------	---------------

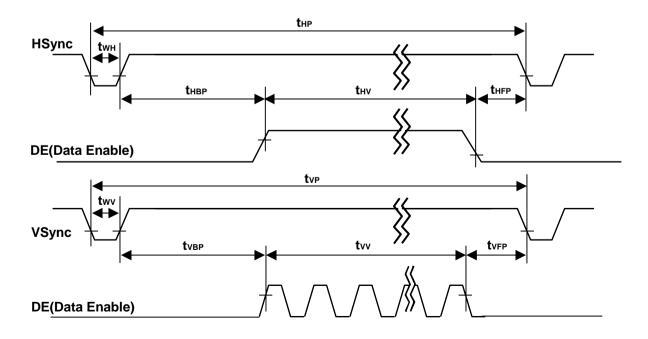

ITEM	Symbol		Min	Тур	Max	Unit	Remark	
	Period	tCLK	12.5	13.8	14.7	ns		
DCLK	Frequency	-	68	72.3	80	MHz		
	Period	tHP	1416	1528	1776	t CLK		
Hsync	Frequency	fн	45	47.4	50	KHz		
	Width	twн	8	32	-	t CLK		
	Period	t∨P	775	790	1063	tHP		
Vsync	Frequency	f∨	47	60	63	Hz	Note 1) PAL : 47~53Hz	
	Width	tw∨	2	5	-	tHP	NTSC : 57~63Hz	
	Horizontal Valid	tH∨	1366	1366	1366			
	Horizontal Back Porch	thbp	24	80	-	tCLK		
	Horizontal Front Porch	thfp	24	48	-	ICLK		
DE	Horizontal Blank	-	48	160	thp- thv			
(Data Enable)	Vertical Valid	t∨∨	768	768	768			
	Vertical Back Porch	tvbp	4	15	-	415		
	Vertical Front Porch	tVFP	1	2	-	tHP		
	Vertical Blank	-	7	22	tvp- tvv			

- Note : Hsync Period and Hsync Width should be even number times of tCLK. If the value is odd number times of tCLK, display control signal can be asynchronous. In order to operate the LCD, Hsync, Vsync and DE(Data Enable) signals should be used.
 - 1. <u>The performance of the electro-optical characteristics may be influenced by variance of the vertical refresh rate.</u>
 - 2. Vsync and Hsync should be keep the above specification.
 - 3. Hsync Period, Hsync Width and Horizontal Back Porch should be any times of character number(8).

3-4. Signal Timing Waveforms

3-5. Color Data Reference

The brightness of each primary color(red,green,blue) is based on the 8-bit gray scale data input for the color the higher the binary input, the brighter the color. The below table provides a reference for color versus data input.

Table 8. COLOR DATA REFERENCE

													Inpu	ut Co	olor	Data	a		_

4. Optical Specification

Optical characteristics are determined after the unit has been 'ON' and stable for approximately 30Min in a dark environment at $25 \pm 2^{\circ}$ C. The values are specified at an approximate distance 50cm from the LCD surface at a viewing angle of Φ and θ equal to 0 °.

It is presented additional information concerning the measurement equipment and method in FIG. 1.

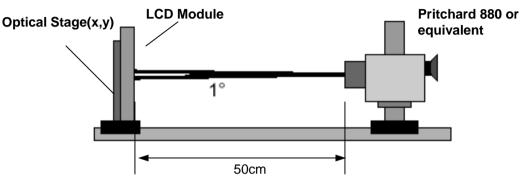

FIG. 1 Optical Characteristic Measurement Equipment and Method

 $Ta=25\pm2^{\circ}C, V_{\text{LCD}}\text{=}12.0V, \text{ fv}\text{=}60\text{Hz}, \text{ Dclk}\text{=}72.3\text{MHz}, \text{ VBR}\text{=}3.3\text{V}$

Gray Scale								6

Note:

1. Contrast Ratio(CR) is defined mathematically as :

Surface Luminance with all white pixels Contrast Ratio = Surface Luminance with all black pixels It is measured at center 1-point.

- 2. Surface Luminance(L_{WH}) is the luminance value at center 1-point across the LCD surface 50cm from the surface with all pixels displaying white. For more information see the FIG. 2.
- 3. The variation of surface luminance , δ WHITE is defined as :

 δ WHITE(5P) = Maximum(L_{on1},L_{on2}, L_{on3}, L_{on4}, L_{on5}) / Minimum(L_{on1},L_{on2}, L_{on3}, L_{on4}, L_{on5})

Where L_{on1} to L_{on5} are the luminance with all pixels displaying white at 5 locations . For more information, see the FIG. 2.

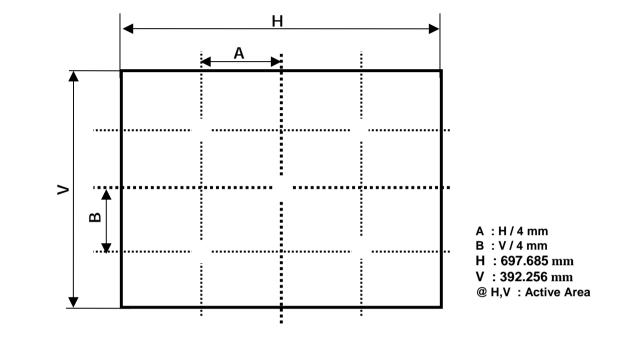

- 4. Response time is the time required for the display to transition from G(N) to G(M) (Rise Time, Tr_P) and from G(M) to G(N) (Decay Time, Tr_D). For additional information see the FIG. 3. (N<M)
- 5. Viewing angle is the angle at which the contrast ratio is greater than 10. The angles are determined for the horizontal or x axis and the vertical or y axis with respect to the z axis which is normal to the LCD module surface. For more information, see the FIG. 4.
- 6. Gray scale specification Gamma Value is approximately 2.2. For more information, see the Table 12.

- $\ \ \text{2. INVERTER Connector Specification.}$
- S12B-PH-SM3(JST) or Equivalent.
- 3. Depth of user hole screw insertion : Max 4mm.
- 4. Torque of user hole : Max 5.0kgf-cm.
- 5. Gap between Bezel and Panel : Max 1.2mm.
- 6. Tilt and partial disposition tolerance of display area as following.
 - (1) Y-Direction : $|A-B| \le 1.5$
 - (2) X-Direction : $|C-D| \le 1.5$

7. Unspecified tolerances to be ± 0.5 mm.

6. Reliability

Table 14. ENVIRONMENT TEST CONDITION

No.	Test Item	Condition
1	High temperature storage test	Ta= 50°C 240h
2	Low temperature storage test	Ta= -20°C 240h
3	High temperature operation test	Ta= 40°C 50%RH 240h
4	Low temperature operation test	Ta= 0°C 240h
5	Vibration test (non-operating)	Wave form : random Vibration level : 1.0Grms Bandwidth : 10-500Hz Duration : X,Y,Z, 10 min One time each direction
6	Shock test (non-operating)	Shock level : 100Grms Waveform : half sine wave, 2ms Direction : ±X, ±Y, ±Z One time each direction
7	Humidity condition Operation	Ta= 40 °C 90%RH 240h
8	Altitude operating storage / shipment	0 - 14,000 feet(4267.2m) 0 - 40,000 feet(12192m)

7. International standards

7-1. Safety

a) UL 60950, Third Edition, Underwriters Laboratories, Inc., Dated Dec. 11, 2000.

Standard for Safety of Information Technology Equipment, Including Electrical Business Equipment. b) CAN/CSA C22.2. No. 60950. Third Edition. Canadian Standards Association. Dec. 1, 2000.

- Standard for Safety of Information Technology Equipment, Including Electrical Business Equipment. c) EN 60950 : 2000. Third Edition
- IEC 60950 : 1999, Third Edition IEC 60950 : 1999, Third Edition European Committee for Electrotechnical Standardization(CENELEC) EUROPEAN STANDARD for Safety of Information Technology Equipment Including Electrical Business Equipment.

7-2. EMC

- a) ANSI C63.4 "Methods of Measurement of Radio-Noise Emissions from Low-Voltage Electrical and Electrical Equipment in the Range of 9kHZ to 40GHz. "American National Standards Institute(ANSI), 1992
- b) C.I.S.P.R "Limits and Methods of Measurement of Radio Interface Characteristics of Information Technology Equipment." International Special Committee on Radio Interference.
- c) EN 55022 "Limits and Methods of Measurement of Radio Interface Characteristics of Information Technology Equipment." European Committee for Electrotechnical Standardization.(CENELEC), 1998 (Including A1: 2000)

8. Packing

8-1. Designation of Lot Mark

a) Lot Mark

A,B,C : SIZE(INCH)

D : YEAR

- F : PANEL CODE
- H : ASSEMBLY CODE

E : MONTH G : FACTORY CODE I,J,K,L,M : SERIAL NO.

Note

1. YEAR

``	Year	97	98	99	2000	2001	2002	2003	2004	2005	2006	2007
Γ	Mark	7	8	9	0	1	2	3	4	5	6	7

2. MONTH

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Mark	1	2	4	4	5	6	7	8	9	А	В	С

3. PANEL CODE

Panel Code	P1 Factory	P2 Factory	P3 Factory	P4 Factory	P5 Factory	Hydis Panel
Mark	1	2	3	4	5	Н

4. FACTORY CODE

Factory Code	LPL Gumi	LPL Nanjing	Hee Sung
Mark	К	С	D

5. SERIAL NO.

Year	1 ~ 99999	100000 ~
Mark	00001 ~ 99999	A0001 ~ A9999, , Z9999

b) Location of Lot Mark

Serial NO. is printed on the label. The label is attached to the backside of the LCD module. This is subject to change without prior notice.

8-2. Packing Form

- a) Package quantity in one box : 4 pcs
- b) Box Size : 880mm X 500mm X 570mm

9. Precautions

Please pay attention to the followings when you use this TFT LCD module.

9-1. Mounting Precautions

- (1) You must mount a module using holes arranged in four corners or four sides.
- (2) You should consider the mounting structure so that uneven force (ex. Twisted stress) is not applied to the module. And the case on which a module is mounted should have sufficient strength so that external force is not transmitted directly to the module.
- (3) Please attach the surface transparent protective plate to the surface in order to protect the polarizer. Transparent protective plate should have sufficient strength in order to the resist external force.
- (4) You should adopt radiation structure to satisfy the temperature specification.
- (5) Acetic acid type and chlorine type materials for the cover case are not desirable because the former generates corrosive gas of attacking the polarizer at high temperature and the latter causes circuit break by electro-chemical reaction.
- (6) Do not touch, push or rub the exposed polarizers with glass, tweezers or anything harder than HB pencil lead. And please do not rub with dust clothes with chemical treatment.

Do not touch the surface of polarizer for bare hand or greasy cloth.(Some cosmetics are detrimental to the polarizer.)

- (7) When the surface becomes dusty, please wipe gently with absorbent cotton or other soft materials like chamois soaks with petroleum benzine. Normal-hexane is recommended for cleaning the adhesives used to attach front / rear polarizers. Do not use acetone, toluene and alcohol because they cause chemical damage to the polarizer.
- (8) Wipe off saliva or water drops as soon as possible. Their long time contact with polarizer causes deformations and color fading.
- (9) Do not open the case because inside circuits do not have sufficient strength.

9-2. Operating Precautions

- (1) The spike noise causes the mis-operation of circuits. It should be lower than following voltage :
 - V=±200mV(Over and under shoot voltage)
- (2) Response time depends on the temperature.(In lower temperature, it becomes longer.)
- (3) Brightness depends on the temperature. (In lower temperature, it becomes lower.) And in lower temperature, response time(required time that brightness is stable after turned on) becomes longer.
- (4) Be careful for condensation at sudden temperature change. Condensation makes damage to polarizer or electrical contacted parts. And after fading condensation, smear or spot will occur.
- (5) When fixed patterns are displayed for a long time, remnant image is likely to occur.
- (6) Module has high frequency circuits. Sufficient suppression to the electromagnetic interference shall be done by system manufacturers. Grounding and shielding methods may be important to minimized the interference.
- (7) Please do not give any mechanical and/or acoustical impact to LCM. Otherwise, LCM can't be operated its full characteristics perfectly.
- (8) A screw which is fastened up the steels should be a machine screw. (if not, it causes metallic foreign material and deal LCM a fatal blow)
- (9) Please do not set LCD on its edge.

9-3. Electrostatic Discharge Control

Since a module is composed of electronic circuits, it is not strong to electrostatic discharge. Make certain that treatment persons are connected to ground through wrist band etc. And don't touch interface pin directly.

9-4. Precautions for Strong Light Exposure

Strong light exposure causes degradation of polarizer and color filter.

9-5. Storage

When storing modules as spares for a long time, the following precautions are necessary.

- (1) Store them in a dark place. Do not expose the module to sunlight or fluorescent light. Keep the temperature between 5°C and 35°C at normal humidity.
- (2) The polarizer surface should not come in contact with any other object.It is recommended that they be stored in the container in which they were shipped.

9-6. Handling Precautions for Protection Film

- (1) The protection film is attached to the bezel with a small masking tape. When the protection film is peeled off, static electricity is generated between the film and polarizer. This should be peeled off slowly and carefully by people who are electrically grounded and with well ionblown equipment or in such a condition, etc.
- (2) When the module with protection film attached is stored for a long time, sometimes there remains a very small amount of glue still on the bezel after the protection film is peeled off.
- (3) You can remove the glue easily. When the glue remains on the bezel surface or its vestige is recognized, please wipe them off with absorbent cotton waste or other soft material like chamois soaked with normal-hexane.
