

2000W 50V-220V 10A Voltage Regulator PWM AC Motor Speed Control Switch Governor

Features:

- 100% Brand new and High quality.
- High efficiency, high torque, low heat generating.
- Convenient and easily use.
- Control the speed of a AC motor with this controller.
- Used in furnace, hot water heater tune, lamp dimmer, small motor, electric iron thermostat.
- Also be Used in series of the lamp or electrical circuit, to play a brightness adjustment, speed, pressure, temperature control effect.
- So as to achieve dimming, thermostats, pressure effect.

Specification:

- Input voltage: AC 220V
- Voltage Regulation: 50-220V
- Maximum power: 2000W
- Current: 10A
- Material: PCB + electronic components

Package Included:

- 1 X PWM Controller
