

BreezeMAX™ Micro Base Station Promotion Starter Kit

TeleGroup is proud to announce the BreezeMAX micro base station promotion starter kit comprised of

- a **micro base station** unit,
- **twenty CPEs**
- and an **AlvariSTAR NMS**

at an extremely attractive price of **US\$23,650**. The micro base station is the newest addition to Alvarion's industry leading BreezeMAX™ product family and is the ideal solution for operators demanding cost effective, scalable WIMAX-ready base station solutions for maximum return from their network deployment.

The micro base station offers the following benefits to operators:

WiMAX-ready HW with upgrade path to WiMAX certified mode with a software upgrade.

Scaleable, cost effective architecture offering a positive business case beginning with a low number of subscribers

Ideal for deployment in remote, low population density and rural areas.

High sector capacity with effective net capacity of up to 18Mbps per 3.5 MHz channel.

Advanced QoS to support voice, data and multi-media applications.

Outstanding coverage with non-line of sight operation.

Effective immediately, Alvarion is accepting orders for the micro base station promotion starter kit and shipments are planned to start at the beginning of March.

The promotion kit is available in several configurations and includes the following elements:

A **BreezeMAX micro base station** comprised of an indoor module (PN 735207 for AC power or 735208 for DC power) and the outdoor radio unit (PN 735210 for band a or 735211 for band b)

Twenty BreezeMAX Data Bridge CPEs comprised of indoor Data Bridge CPE (PN 735100) and outdoor radio with an integrated vertical polarized antenna (PN 735110).

AlvariSTAR NMS software with license for a single micro base station and twenty CPEs.

Base station cables, CPE cables and the base station antenna are not included in the kit and should be ordered separately per site requirement.
